Deep Learning – DA 1 – Question Paper

The student has to execute the below algorithms and present them in the DA with the points mentioned below.

Question-DA1: Autoencoders, DALL-E, DALL-E2 and IMAGEN

Points to cover in DA:

- Theoretical presentation of each topic/sub-topic mentioned in the question
- Strengths and weaknesses of the algorithms/ techniques
- Algorithms, flow charts, and Coding
- Execution results including Screenshots like input and outputs for each algorithm
- Max. number of pages: As per the required, no limitation.
- Programming Language: Any programming language for coding can be used as per the student's choice
- Last date for submission in VTOP (Check in VTOP)
- Give proper conclusion and references
- No plagiarism
